Keltec Resourcing services provide on-demand staffing and service delivery for IT operations and projects. We offer a convenient and cost-effective solution for businesses of any size to obtain temporary assistance to cope with peaks in workload, or are developing new business areas where they do not yet have the requisite skills or experience in-house.

Keltec provides a comprehensive range of services that includes operational skills, consulting and outsourcing services using our own employees and a network of highly-skilled IT Associate consultants with specialised skills who have in-depth experience in all our competency areas.

Highly-skilled and accredited consultants

Our aim is to provide resource for clients' service delivery projects effectively with highly qualified and accredited technical specialists:

- Keltec IT consultants and project managers
- Over 250 IT Associate Consultants with specialised skills
- Highest levels of partner technology accreditation (Cisco, HP, Microsoft, Oracle, Sun)
- Project consultancy and management to Prince2 standards
- Service management to ITIL standards

In addition, Keltec can provide engineers to assist customers with their IT projects and we can provide ongoing support using our remote monitoring and management services.

Flexible resourcing from one-day to multi-year

Keltec provides a full service to help you define the skills required, pre-appointment interviewing of candidate consultants, short term assignments from as little as 1 day to multi-year, regular performance reviews and conversion from temporary to permanent positions.
